Federal guidelines for HSA eligible high deductible plans allow coverage of certain preventive medications prior to meeting the deductible. Drugs on this list were evaluated and selected based on IRS guidance and clinical validation to ensure that the indications for which they are commonly prescribed are considered preventive within established guidelines. This list contains examples of preventive medications – it may not include all preventive medications. Some forms (i.e. creams vs. tablets) or some strengths of a drug on this list may not be considered preventive. Certain restrictions including prior authorizations, coverage exclusions, quantity limits, or step therapy requirements may still apply. Please contact MaxorPlus if you have any questions regarding coverage.
